THE SCHOOL—FROM THE PARK.

TRINITY COLLEGE SCHOOL, which was founded in 1865, aims at providing a complete education for boys by developing to the utmost their mental, moral and physical powers. The English Public School System is taken as a model.

VIEW FROM THE SOUTH-EAST.

THE SCHOOL has a charming situation in the midst of a healthful and beautiful country.

Built upon a hill about a mile from the Town of Port Hope, and half a mile from Lake Ontario, which it overlooks, the School site is all that could be desired.

THE SCHOOL—FROM THE PLAYING FIELDS.
(Showing the Gymnasium).

THE SCHOOL was rebuilt in 1895. In designing it, the lighting, heating and ventilation of the classrooms and dormitories was a primary consideration.

The building is as nearly fire-proof as it can be made.

It is divided into five sections by heavy fire walls, and the only communication between these sections is on the line of the corridors.

Fire-mains, with hose attachments, are on every floor.

THE SCHOOL—FROM THE HEAD MASTER'S LAWN.

PUPILS are prepared for the Matriculation Examinations of the Universities, and the Entrance Examinations of the Law and Medical Schools, the Royal Military College, the Army, Navy, etc. In the Modern Department, special attention is directed to preparation for commercial pursuits.

A Preparatory Form has been commenced for younger boys who are not sufficiently advanced for the work of the lower First Form.

The boys prepare their lessons under the supervision of one of the masters. This enables them to get any necessary explanation or assistance in their work. Boys who are backward or have not formed habits of study receive special attention.

THE NORTH-WEST WING—FROM THE QUAD.

IN this view is shown (to the left) the end of the latrine building, which is absolutely fire-proof.

In connection with the system of ventilation and heating, a tunnel, ten feet wide and eight feet high, runs under the entire building. In this the fresh air is introduced and warmed before being conducted by ventilating shafts to the various rooms.

Looking through the Arch towards the Playing Fields.

Latrines.

THE QUAD.

THE first of these illustrations shows the arched passage between the Main Building and the Gymnasium. In bad weather the boys can pass from one to the other without going out of doors.

THE wing, shown in the second illustration, contains the latrines, bath rooms, boiler room and lavatory. Though connected with the main building, it is practically isolated.

The baths and bath rooms are commodious, and are available for use by the boys at any time.

THE DINING HALL.

PRAYERS are said daily in the Chapel. On Sundays there is a celebration of the Holy Communion at half-past seven, a short service at eleven, and evensong with a short sermon at a quarter-past four.

A CORNER OF A DORMITORY.

THE HEAD MASTER'S STUDY.

AFTER careful consideration, the School authorities, in the light of many years' experience, decided, in rebuilding the School, to have dormitories capable of accommodating from four to six boys.

The first illustration shows a corner of one of these dormitories.

AS the Head Master spends a large part of each day in his study, which is in the Main Building, the boys can readily consult him with reference to their work or any difficulties connected with their school life.

THE KITCHEN.

LAVATORY.

THE domestic arrangements are in charge of two experienced lady matrons.

THE MAIN STAIRWAY.

THIS illustration shows the staircase opposite the main entrance.

There are four such stairways, each running to the top of the building, and constructed throughout of stone and iron.

THE CRICKET TEAM.

HEALTHFUL recreation is provided for, as far as possible, throughout the year. On the School premises, comprising upwards of twenty acres, are excellent Cricket, Football and Tennis Grounds, and a Skating Rink; there is also a large covered Gymnasium, with a Fives Court, and a Playroom for use in bad weather.

THE CHOIR.

BOYS desiring to join the School Choir are trained in voice production and sight reading by an experienced instructor.

THE HEAD MASTER'S HOUSE.

THE Head Master's House is situated in the School Grounds, to the East of the Main Building.

THE COTTAGE HOSPITAL.

THE COTTAGE HOSPITAL, situated a quarter of a mile from the School, is in charge of an experienced nurse. For non-infectious cases there are comfortable hospital rooms in the main building, adjoining the matron's apartments.

THE TOWN OF PORT HOPE.
A view of the Shore Line.

PORT HOPE is on the main line of the Grand Trunk Railway, sixty-three miles east of Toronto. The town waterworks, from which the School is supplied, were recently constructed in accordance with the recommendations of the Provincial Board of Health.

TERMS.

The School Year is divided into three terms.

Michaelmas term begins in September, Lent Term in January, and Trinity Term in April.

Boys are admitted at any time.

SCHOLARSHIPS.

Two Entrance Scholarships of the Annual Value of $60.00 each, and tenable for five years, are offered for competition at the beginning of Michaelmas Term in September of each year.

BURSARIES.

Twenty Bursaries of the Annual Value of $120.00 each are offered to sons of the Clergy of the Church of England in Canada.

FEES.

Payable in advance, $80.00 per term, $240.00 per annum.
